Spotlight on Records - Navy Deck Logs

Deck logs from U.S. Navy ships are daily chronological entries documenting the administrative activities of a ship. Deck logs can be useful to genealogists, researchers, and historians as information contained within logs may include details about ship movement, meteorological and operational accounts, sick lists, injuries, honors and even arrests during a particular month. It is no surprise that deck logs are among the most popular U.S. Navy records in the holdings of the National Archives.

As we remember the 75th anniversary of the attack on Pearl Harbor, you may be interested to see what the deck logs from December 7, 1941 reported about the events of the day.

Chris Carter, Archivist at the National Archives in College Park, explains the importance of the deck logs from the USS Maryland during the attack on Pearl Harbor:

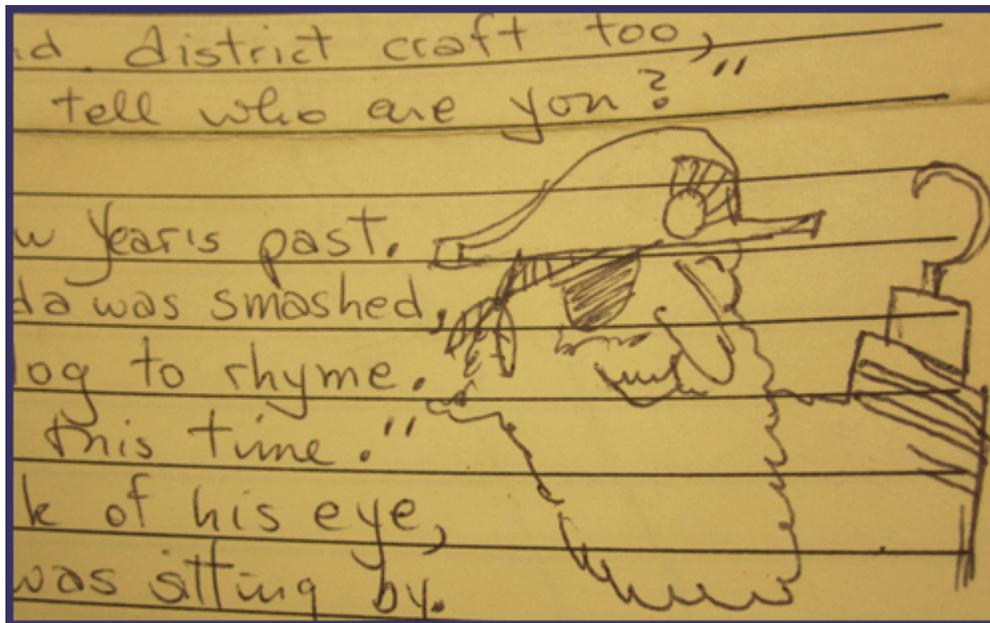

While the December 1941 deck log from the USS Maryland is not yet available in the National Archives Catalog, the deck log from the [USS Monaghan \(DD-354\)](#) includes details about the attack and its engagement with a Japanese submarine on December 7.

UNITED STATES SHIP <u>MONAGHAN</u>		Sunday, 7 December, 1941	
ZONE DESCRIPTION <u>Plus 10$\frac{1}{2}$</u>		REMARKS

Passed over submarine, dropped two depth charges which exploded at 30 feet depth. Observed one torpedo track passing about 50 yards on starboard beam. 0843 Backed engines emergency, struck dredge moored on west side of channel. Sustained slight damage to starboard plates forward above waterline at frame 38. An inspection of the ship revealed the following damage: sprung outboard bulkhead in compartment A-204-L, tear in plate adjacent to horizontal seam $\frac{1}{2}$ inch wide, 3 feet long, moderate leakage; bulkhead shored and leakage stopped, found salt water contamination of oil in fuel oil tank D-411 from an unknown source. 0844 Ran aground in soft bottom on shoal off Beckoning Point. 0846 Backed clear of shoal, proceeding out of channel. 0908 Passed Pearl Harbor entrance buoys abeam, entered International Waters, proceeding on various courses at 12 knots in destroyer off-shore patrol. 1040 Ceased patrolling proceeding at 25 knots to screen ST LOUIS in company with PHELPS and BLUE.	<i>J. W. Gilpin</i> J. W. GILPIN, Ensign, U.S. Navy.	

Over the last five years, more than 13,500 deck logs have been digitized by National Archives staff and are available in the National Archives Catalog: "[Logbooks of the U.S. Navy Ships and Stations, 1941-1978](#)." This represents just 2% of the entire series! Deck logs are added to the Catalog as file units, and each file unit represents one month of logs on a US Navy ship. This series contains more than 44,000 physical boxes and is being digitized at a rate of between 2,000-2,500 monthly deck logs each year. National Archives staff are currently digitizing and adding deck logs from the Vietnam War to the Catalog.
