INDEX TO NEW ENGLAND NATURALIZATION RECORDS, 1791-1906

Introduction

On this microfilm publication is reproduced an index to photocopies of naturalization records for New England, both of which are part of the Records of the Immigration and Naturalization Service (Record Group 85). The photocopies and the index to them resulted from a Work Projects Administration project in the late 1930's to centralize, photocopy and index information in naturalization records scattered among federal, state and local courts. The WPA was terminated before the project was completed.

This is an index to photocopies of naturalization documents filed in courts in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont from 1791 to 1906. The photocopies and the index are in the National Archives-New England Region. The index consists of 3x5 inch cards arranged by state and thereunder by name of petitioner, arranged according to the soundex system. The index refers to the name and location of the court that granted the certificate of naturalization, and to the volume and page number (or certificate number) of the naturalization record. The printed cards have spaces, often left blank, for other information from the naturalization papers such as place and date of birth.

The 5x8 inch photographic copies of naturalization documents usually consist of two pages for each naturalization, with all or some of the following information: petition for citizenship, oath of allegiance, record of previous citizenship, place and date of birth, occupation, place and date of arrival in the United States, name of the ship, place of residence at the time of application, and name and address of a witness to these statements. They are arranged by state, thereunder by court name, and thereunder numerically by volume, bundle number, or page or certificate number. Earlier records contain less information than later ones.
